Product Overview

This Reinforcement Plate is used to ensure the Media Roller Mount does not flex when using heavier label stock like RFID labels in high vibraiton enviornments. Locations such as lumber yards or offroad environments may allow the mount to flex enough to tear labels and this plate prevents that flex.

This plate only fits existing Media Roller Mounts and is not usable on its own. It does not include M4 Fastener pack and is designed to use existing ProClip mounts and pedestals.

Features

Reinforcement plate designed to brace the Media Roller Mounts for extreme vibration environments.

Specifications

- Steel Plate
- Fits specific Media Roller Mounts
- For use in extreme vibration enviornments

UNMATCHED LEAD TIMES
Stocked Items 1 - 7 Days
Custom Items 4 - 6 Weeks

PRECISE FIT
Our CNC machining process produces exact-fitting parts at fast speeds.

BUILT TO LAST QUALITY
We use the highest-grade polymers and metals for strength and durability.
