

Adapter Plate for Holders with Old Style Tilt-Swivel

Part #215501

\$2.99

The Locking Move Clip Adapter Plate is designed to compensate for the various thicknesses of our Tilt-Swivel Base Plates. It simply snaps to the back of your Tilt-Swivel base plate. You don't need to use the adapter plates if you have a Tablet Holder or Mobile Computing Holder. The base plate on these holders are slightly thicker and will slide directly into the Locking Move Clip Female Plate.

Features

This Tilt-Swivel adapter plate may be required if your Tilt-Swivel is too loose. Holders with older design Tilt-Swivels will require this adapter.
