Product Overview

This non-charging cradle is designed to keep the MC9300 & MC9400 series mobile computer secured with the screen facing away from the operator.

The channeled sidewalls are designed to grip the MC93 & MC94 handheld and ensure it stays in the cradle even in high vibration environments like in a forklift.

This holder features the AMPS hole pattern which is commonly used for mounting in vehicles. This is compatible with mounts from both ProClip and other providers of ball, forklift, bar, pipe and cart mounts.

Features

- Custom fit to device with boot
- Designed to keep the screen away from the operator when docked.
- Accommodates standard and gun models
- AMPS hole pattern for attachment to any mount
